

**MODEL NO.: CBS952
1 PORT SERIAL CARDBUS**

FEATURES

- Fully software compatible with 16C450, 16C550, 16C650, 16C750 and 16C950 UARTs
- UARTs, Local Bus and Parallel port configured with IO or memory base address
- Automated in-band flow control using programmable Xon/Xoff in both directions
- 128-byte deep FIFO per transmitter and receiver
- Supports Big Endian byte-lane conversion
- Supports Plug and Play using optional non-volatile configuration memory (EEPROM)

HARDWARE

Interface	PCMCIA 1 PORT SERIAL
Type	RS232
Chipset	MPCI952
Mode	
Port	1 Ports Serial
	Baud rates up to 115200bps in asynchronous mode
OS Support	Windows 98/ME/2000/XP/VISTA, Linux, DOS
